

CLIENT CASE STUDY

NAPA

Who is NAPA?

NAPA Auto Parts is a cooperative distributor of automotive replacement parts, accessories and service items. Their mission is to improve the distribution of auto parts to serve the people and businesses who rely on cars and trucks for their transportation needs.

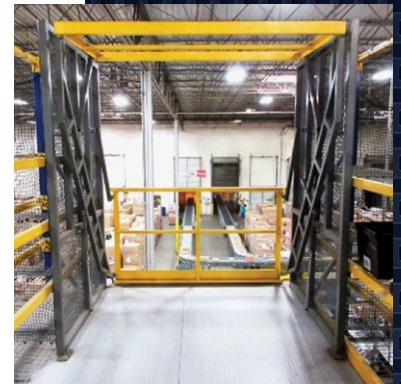

Addressing the Issues

The primary issue NAPA faced was the overall safety of their mezzanine safety gates.

ISSUES:

1. Safety gates were:
 - Outdated
 - Unsafe
 - Not OSHA compliant
2. The gates required two employees to operate making them inefficient

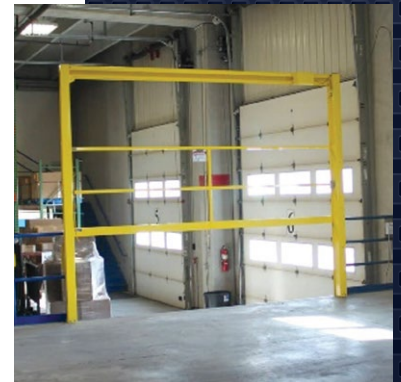

D&DT Solutions

NAPA was able to put the D&DT Multi-Solution Advantage to the test. Dock & Door Tec utilized many resources to provide the ultimate solution for each gated area. Due to space limitations and structural obstacles D&DT used multiple manufacturers to achieve the ideal outcome.

SOLUTIONS:

1. Horizontal gates from Wildeck
2. Security grilles from Dynamic Closures
3. Vertical mezzanine gates from PS Doors

All gated areas now operate with wireless remotes on upper and lower levels. Having access to wireless remotes has reduced man hours needed for operation of the gates. NAPA now has a safe and OSHA compliant work environment.

We have used D&DT for years. We trust the recommendations they provide.”
